Summary

Senior product leader and hands-on builder creating agentic platforms and enterprise integrations at Microsoft. Experienced translating identity, authorization, privacy, auditability, human approval, extensibility, and reliability requirements into coherent products and reusable platform contracts. Comfortable moving from strategy and positioning to architecture, implementation, evaluation, and launch.

Work Experience

Microsoft

Seattle, WA

SENIOR PRODUCT MANAGER, MICROSOFT OUTLOOK

Sept. 2024 - Present

- Lead product strategy, positioning, and execution for Outlook's MCP-based agent platform while contributing directly in .NET and TypeScript to ship significant features across mail, calendar, people, tasks, and extensible UI.
- Define shared contracts for tool discovery, authentication, authorization, privacy classification, human approvals, auditability, and telemetry—turning partner-specific needs into reusable platform capabilities.
- Designed and shipped AI-assisted compliance automation that derives required evidence and artifacts from code, automates previously manual submissions, and saves the engineering team dozens of hours each month.
- Led creation of AI evaluation tooling for agentic hill-climbing across Outlook scenarios; author and maintain evaluation assertions and repeatable experiment pipelines that quantify improvements to model, prompt, and tool behavior.
- Partner with security, privacy, compliance, and product teams to establish protocol-conformance, failure-handling, and launch gates that balance agent capability, user trust, reliability, and developer velocity.

Microsoft

Seattle, WA

PRODUCT MANAGER, MICROSOFT 365 & OUTLOOK

Jun. 2020 - Sept. 2024

- Shipped shared platform components across Outlook, Office, and Teams used by 200M+ monthly active users, aligning complex requirements across extensibility surfaces and more than 70 partner teams.
- Led cross-functional engineering, design, research, and marketing teams from customer discovery through launch; created a multi-year platform vision endorsed by executives across organizations.

Microsoft

Seattle, WA

PRODUCT MANAGER INTERN

Summers 2018 & 2019

- Built analytics and cost models with Power BI and Kusto that unlocked new Office service use cases and informed cloud-management product strategy for more than 130M managed devices.

Cisco

Toronto & Ottawa, ON, Canada

SYSTEMS ENGINEERING INTERN

Summers 2016 & 2017

- Built Webex Teams chatbots and service integrations in Node.js and maintained enterprise networking, infrastructure, and security demo environments supporting major Canadian government opportunities.

Penguinleaf Technologies

Toronto, ON, Canada

CO-FOUNDER & LEAD CONSULTANT

penguinleaf.com | Jun. 2014 - Jun. 2020

- Co-founded a managed technology consultancy serving dozens of organizations and thousands of users; owned customer discovery, solution architecture, implementation, and ongoing operations.
- Migrated customers to cloud-managed identity, networking, device management, and productivity platforms, improving security and reliability while reducing total cost of ownership.

Selected Leadership

HackMcGill

Montreal, QC, Canada

CO-DIRECTOR

2019.mchacks.ca | May 2017 - May 2019

- Led McGill's largest hackathon for more than 600 participants and 34 sponsors; restructured the organizing team, doubled fundraising, and raised C\$95K.

Computer Science Undergraduate Society (CSUS)

Montreal, QC, Canada

PRESIDENT

mcgill-csus.ca | Sept. 2016 - May 2019

- Led services and advocacy for more than 1,800 computer-science students; created a 40-person peer-tutoring program serving more than 350 help requests per week.

Education

McGill University

Montreal, QC, Canada

BACHELORS DEGREE, MAJOR IN COMPUTER SCIENCE, MINOR IN ECONOMICS

Sept. 2015 - Dec. 2019
